

## 10<sup>th</sup> anniversary of Enzymicals AG

Officially founded on the 27.08.2009, Enzymicals has now celebrated its 10th anniversary. Over the course of our festive event, the successful establishment of a profitable company in the field of industrial biocatalysis was recognized.

On the 3/4 September, the whole Enzymicals team and its closest network partners have met to celebrate the 10th anniversary. A fantastic boat tour with historic ships and a festive event comprising greetings from the supervisory board as well as guest lectures from academia & industry contributed to a successful event.
