

Enzymes, Chemicals, Solutions

The focus of Enzymicals is to provide integrated solutions for biocatalytic applications. Dedicated to design, develop and implement cost-effective, sustainable and scalable chemo-biocatalytic routes. Enzymicals offers a recognized expertise in the application of enzymatic processes for the synthesis of complex chemicals up to industrial scale.

Enzymicals is your reliable partner to answer your specific questions about enzymes and their application in organic synthesis processes!

Enzymes, Chemicals & Solutions
made by Enzymicals

Enzymical®
Enzymes | Chemicals | Solutions

Enzymes

Enzymicals offers a broad selection of recombinant **ENZYMES** suitable for research, development, production and diagnostics as well as a tailor-made protein expression and optimization service. A small selection of enzymes is available via our standardized catalog business on a simple price per quantity basis.

Chemicals

Enzymicals manufactures a range of **CHEMICALS** as chiral building blocks, intermediates and specialty chemicals as well offer custom synthesis on request. By using chemo-enzymatic routes our production capacity spans from analytical to multi-kilogram scale.

Solutions

The independent enterprise provides state of the art **SOLUTIONS** in development, optimization and piloting of robust chemo-enzymatic processes for the production of fine & specialty chemicals. Together with our network partners, we expand our service to ASMF filing, regulatory affairs, cGMP production and bulk scale supply.
