

Minister Christian Pegel visited Enzymicals

Christian Pegel, Minister of Energy, Infrastructure and Digitization of the State Government of Mecklenburg-Western Pomerania, visited Enzymicals AG during a visit to the Biotechnikum Greifswald on 05th of July 2017.

In conversation with the employees, he inquired about the development of the company and the plans and challenges for future growth. The fact that the company now offers 16 highly qualified employees a job and is in the black stands for the success of the young company. At the same time, it was underlined how important the spatial expansion into the new to build Centre "Life Science and Plasma Technology" is to the further development of the company. As a result, Enzymicals would be able to significantly expand its capacities for the production of enzymes as well as for specialty chemicals, while maintaining its immediate vicinity to the University of Greifswald.
