

Senior Fermentation/Biocatalysis Scientist and Project Manager (m/f/d)

Would you like support the global industry in the ongoing transition to biologically inspired production concepts? If so, then Enzymicals AG is the right place for you! Our company is located in the vibrant university and Hanseatic city of Greifswald, directly at the Baltic Sea. You will work where others go on vacation! We deal with the implementation and optimization of chemo-enzymatic processes that will support the growth of the bioeconomy. Our worldwide customer base ranges from small start-ups to the largest international companies in pharma, food as well as flavors & fragrances. The promotion of your personal development as well as your professional qualification are self-evident for us.

To manage the increasing number of projects that we do in parallel, we are seeking an experienced fermentation and/or biocatalysis expert who is in charge of their own projects and is tasked with the management of several other projects. This is a hands-on lab job, combined with a good amount of planning, proposal writing and reporting.

The position is permanent (full-time)

Responsibilities

- Planning and overseeing all aspects of customer-funded projects, from initial ideation through to completion
- Performing experiments in the lab where required
- Coordinate people and lead our projects to success
- Intense communication between the project teams and the management
- Monitor progress of projects and make adjustments as needed
- Keep clients and stakeholders informed through regular reports
- Identifying and mitigating potential risks to timelines and budgets

Requirements

- Several years of hands-on experience in execution of scientific projects in an industrial setting
- Profound theoretical and practical knowledge of fermentation, biochemistry and/or biocatalysis
- Technical skills and solid understanding of project management
- Experience seeing projects through the full life cycle
- Preferably experience in Design of Experiment (DoE), setting up experiments and analyzing the results
- Detail-oriented and excellent communication skills
- Strong interpersonal skills
- Proven ability to solve problems creatively
- Must be proficient in English

We look forward to receiving your application. Please send your application documents including your expected salary to Dr. David Liese:
